MT SOMERS, MID CANTERBURY**

40 R2 Ang Hfrs

22 Ang Hrfd Hfrs

11 R2 Hrfd Hfrs

PTIC Angus Bulls

TB Status C10

At Wakare we have been using top bulls from top SI and NI herds for 10 years and have continually strived for marked improvement, with a particular focus on meat quality and yield.

This is all having taken care of calving ease and growth rates and survivability as base necessities.

This year's Angus heifers are all in calf to yearling bulls, bred at home, muscle and fat scanned, and specially chosen as the best.

All Angus and Hereford heifers have been muscle scanned as well. This is the entire line of Herefords, none have been retained this year. We are very confident that these will grow on to become productive and useful additions to any herd.
